Done by Mr. McKay

... WELCOME ...

Welcome to the third annual Christmas Party held by the employees of Mineola Skating Rink. Tonight being Christmas Eve, we wish to extend our heartiest wishes to all for a Merry Christmas.

We are most grateful for the cooperation that you, our friends who are with us tonight, have given, and also for the assistance of the advertisers, and those individuals who have given unstintingly of their time and services to make this occasion a happy one.

The management has not only made this affair possible, but it has gone to great lengths to help the employees make this a propitious event, for which we are truly thankful.

## OUR RINK

Ever since that memorable summer of 1934 when the Mineola Skating Rink first opened its doors to the skating public, Mr. Van Hoen has been improving, building, enlarging, and adding new and novel features to his (and our) rink. Work on improvements for the skating comfort and enjoyment of Mineola patrons goes on unceasingly. As one project is finished, another one is started. Over \$80,000 has been expended within the past two years on such work, an investment calculated to pay dividends, not in dollars and cents, but in comfort, convenience, good will, and prestige.

A marvel in the skating rink world, just recently finished, is the much discussed modern silver ceiling over the main skating floor. Prominent visitors from near and far, nationwide rink owners, distinguished skaters, and others, have all expressed admiration at its beauty, and many are they who have been visibly impressed by its shimmering iridescence during the 'moonlight' numbers, when the main floor illumination is dimmed and the extensive colored lighting system is faded in.

An elaborate sound proofing project, designed to lower the din of skates and raise the music level above any extrinsic noise, is another recent innovation. This acoustical blanketing has been attractively covered with draped blue silk, enhancing the beauty and appearance of the silver ceiling, the rink in general, and the entirely indirectly lighted skating floor.

The discomfort and annoyance present in most rinks due to impure and dust laden air has been remedied in the Mineola Rink by the installation of a costly ventilating system which in twelve minutes can completely empty the rink of foul air, replacing it with clean fresh air, free of dust and other impurities. During summer months the fans can be reversed, thereby acting as a cooling system by constantly keeping fresh air circulating throughout the rink.

Most of you know that the Mineola Rink was the first to install a Hammond Electric Organ, now universally used by rinks all over the country; first to use an Electric Minipiano in conjunction with the organ; first to build a separate beginners' rink; first to provide an elaborate, richly furnished lounge and lobby, done entirely in a rustic mode, and first to employ Instructresses for the express purpose of teaching beginners and learners to skate. Mineola has the largest unobstructed main skating floor, laid by experts with the finest maple obtainable, and kept in first class condition by constant attention.

Mineola leads the way—others follow.

**INEZ and EARL VAN HORN**

Inez and Van, as they are better known to their many friends, are bringing roller skating each day to higher and higher planes of perfection.

Their ceaseless and untiring efforts are known to all members of the FIGURE SKATING CLUB, and the innovation of the newly formed dance classes will go a long way toward making roller skating a finer and more appreciated sport and pastime.

We salute you, Inez and Van. May all your dreams and ambitions in this field not only materialize, but bring the true recognition which you rightly deserve.

We feel that it is about time that one of our close friends received a proper introduction to the skaters who have not already had the pleasure of actually meeting him. He is the man who has made happy, in the neighborhood of about two hundred skaters, by taking a definite part in the rink activities to the extent of giving away two pairs of skates every Saturday night at the rink as Door Prizes. We refer to none other than Jack Hoff, proprietor of Hoff's County Diner and Tavern. Those of us who are fairly well acquainted with Jack, know him to be a hail fellow, well met. But even these of his friends probably know little else about him, because Jack is a rather modest and retiring chap, who doesn't believe in talking about himself. In fact, we had to refer to conversations with

him as far back as last Summer, remembering a few words here and there, just to get enough material for this story.

Jack, as he is known to most of us, no doubt can point with pride to a long line of forbears, many of whom probably had some hand in the development of the history of America. However, the only statement he makes in regard to this, is that a greatgrandfather of his fought in the war of 1812. Jack, himself, was born right here in New York State. He became, in time, a civil engineer and left these parts to go out West. He also served in the Naval Flying Corps during the World War and received his discharge from the service in 1919.

Jack went from civil engineering into the business offices of the Horn and Hardart Restaurant chain. Jack started his own business in Mineola by opening two dining cars. One in November, 1926, and the other in May, 1927, under the names of the County Diners. His present place of business was established in August, 1934. It might be added that Jack not only designed it but he also supervised the construction.

At this point we should like to point out that while in Horn and Hardart's a beautiful friendship evolved. This friendship grew and blossomed forth into a wedding ceremony in the Garden City Cathedral on June 18th, 1927. Thus Mrs. Hoff not only became his close business associate, a relationship which still exists, but his partner in life itself.

Jack Hoff and Earl Van Horn have been good friends since they met in 1934. Oddly enough, Jack has never been on roller skates. However, he is somewhat of a sports enthusiast, his favorites being game fishing and prize fighting.

Thus we have introduced to you Jack Hoff, a really swell guy. There is just one more thought we would leave with you. Jack has a pet peeve. Yessir, and you probably will think it a touch of egotism, but it's a fact. When business men come into his establishment looking for the owner, they usually refuse to believe so young looking a man could be the proprietor of such an extensive place of business.
